

(a) 边界截断规则

(b) 介质 A 之间的接触

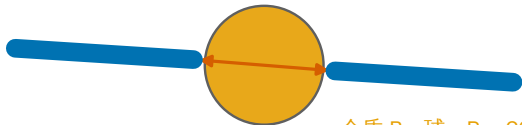

表面最短距离 $\leq \delta = 1.8 \text{ nm}$ ，判为导通

介质 A : 球柱体, $r = 30 \text{ nm}$, 轴长 5000 nm

(c) 介质 B 充当棒间的桥

一颗 B 最多能跨接轴距 $2(R + r + \delta) = 463.6 \text{ nm}$ 的两根 A

介质 B : 球, $R = 200 \text{ nm}$
